

15 Good Reasons for Choosing Flow-Mon

1. The units can be mounted in any orientation
2. No glass to break
3. Dirty water, oils and coloured liquids no problem
4. The units are among few that incorporate a 15amp switch
5. Wide choice of switches available – 3, 4 and 6 wire switches, Flameproof, Explosion Proof.
6. More than one switch can be installed.
7. Switching Point easily adjusted in the field
8. Non contact 4-20mA position encoder
9. Standard enclosure box IP 65, other boxes can be weatherproofed IP 54
10. Springs are not in contact with the Flowmon Ltd.
11. Large choice of materials to suit most applications
12. Only one moving part
13. Flow switches are needed to monitor flow. In lubrication and spray systems flow switches are better than pressure switch. A blockage will be signalled by Flow Switch whereas pressure remains – pressure switch will not indicate trouble
14. Flow Switches are invaluable for balancing circuits and the added switch will warn operators of any later change in flow.
15. Individually built and calibrated to customers requirements, usually within 2 weeks.
